

## Ethical Hacker / Penetration Tester

### Based in Manchester (other UK locations considered)

Are you a Penetration Tester at the top of your game? Are you excited by new challenges and passionate about security and delivering the best possible tests and remediation for your clients? Do you want to part of a CREST affiliated company?

Due to substantial growth, we are expanding our technical team to meet the increasing demands of our clients. We are looking to employ additional full-time, experienced IT Security Consultants interested in working for a dynamic organisation in a fast-paced working environment. Competitive salary, bonus and benefits package including Share options and Pension scheme and more is on offer to the right candidate.

### About ZeroDayLab

At the forefront of IT Security Consulting, ZeroDayLab's client base is diverse. Our blue chip clients span across EMEA and come from all industry sectors from medium-size organisations to the FTSE100. Our holistic, 360° approach to IT Consulting Services and complementary security solutions are unparalleled and enable us to retain our clients by working as their strategic security partner, delivering far greater ROI.

We have two passions, Total Customer Satisfaction and Total Security Management; to deliver this, we employ only the very best people across all our locations in Brighton & Hove, London, Manchester, Amsterdam, Dublin, Bangalore and the US.

Your future is important to us this is why we ensure that you will have the time needed study and certifications. We actively encourage our consultants to develop their careers by offering paid training, certifications, accreditations, blogging, White Papers, conferences – we ensure you have the time you need.

### Job Description

The successful candidate will be located within commutable distance of London, Birmingham or Manchester in the UK. You will enjoy working for a smaller, dynamic, focussed organisation where every member of the team is Passionate about Total Security Management. **For this role we are seeking an Ethical Hacker / Penetration tester with considerable client facing experience** as there is a requirement to perform a range of IT Security consulting services.

### Key Candidate Criteria:

- Extremely technical in information security architecture / Penetration Testing
- Technically adept in Manual Penetration testing (both internally and externally).
- Must be able to at least explain in English how a ROP attack is found and executed and also able to provide delivery of solutions onsite to clients for both Windows and Linux environments.
- Customer facing, comfortable presenting your findings to our clients.
- Must have strong technical understanding of current security trends and solutions.

- Have worked in a large datacentre (ie, be comfortable with switch patching and testing procedures when located in a datacentre) Understands technical details of pentesting, such as buffer overflows, XSS, SQL Injection, etc.... and the full OWASP Top 10.
- Has in-depth knowledge of using manual penetration testing proxies such as Burp Suite Pro to good effect.
- You must be able to document / report in English to a very high standard.
- Additional languages would also be a bonus but not necessary.
- You should hold one or more of the following (CREST, OSCP, OSCE), other qualifications will also be considered.
- You will agree to undergo a technical test plus interview and provide suitable references.
- Be willing to travel if required.
- Be punctual and meet agreed deadlines.
- Ideally be based from home and client sites.

Successful candidates will be required to undergo background screening and offers of employment will be subject to the results of this screening.

In the first instance, please provide your current CV and contact details to Ms. Paula Gardner, ZeroDayLab Human Resources Manager at [pgardner@zerodaylab.com](mailto:pgardner@zerodaylab.com). For further information, please visit [www.zerodaylab.com](http://www.zerodaylab.com)
